

## Network services

Computer Networks, Local Area and wide area network installation and support.

Computer Networks and systems are an essential part of business. When choosing hardware, such as for example a server to support your business you need the advice and guidance of professionals.

Making the wrong choice can be a costly mistake, affecting your operations, and causing frustration and loss of business.

tri-IT staff have been advising companies in the right choice of I.T. systems and computer networks for a long time, which is why we are the people you need to speak to before making a choice. We understand that the correct solution must meet the needs of the business within your budget.

tri-IT are a Microsoft Accredited Partner and specialise in Microsoft Small Business solutions for the SME market. We provide a complete specification, supply, and installation service for all your I.T. needs.

We supply hardware on a cost+ basis so that you always know that you are getting the best value for money in your I.T. purchases, or if you prefer you can order and we will install the equipment for you.

Your Network Server is the heart of your operations which is why tri-IT recommend installation of HP Proliant servers. Like cars servers come in a wide range of specification and prices. Get it wrong and your business will struggle, so get it right and seek advice before you purchase.

In the event of hardware failure (where practical), loan equipment can be provided to provide you with temporary repair while we source components.

### What makes our services different from other suppliers?

All our staff have a part ownership of the business, they do not just work for a basic wage, which means that as a company we are focused on our customers and their business.

Our goal is to always go that extra mile!
